To Whomsoever It May Concern

One of the most disturbing problems we used to encounter in our Hotel premises was the odour of cigarette smoke in our Staff Smoking Zone, located next to Staff Gymnasium in the basement.

We installed *PureAir* by Zeco Air Purifiers and discovered that the product removed all odors, as well as air-borne pathogens, detected by Hotel's in-house Laboratory testing.

Further, these air purifiers also removed food odors from some of the guest rooms where we had once faced such problems.

I heartily recommend the use of this technology by Zeco Air Purification systems. I do hope others will also recognize the advantages of using Zeco Air Sanitization Technology.

Best wishes
